

YOU CAN DO MORE WITH THIS TRACTOR. BECAUSE IT'S MADE TO HANDLE MORE.

VERSATILITY – Truly a versatile workhorse—only better.

- Mid PTO A rear and mid PTO give you more versatility on operations and implements. The rear PTO and mid PTO levers allow for independent or simultaneous operation of both drives. The electro-hydraulic PTO clutch features push-button control, so you can engage or disengage both on the go—no clutching, no reaching for levers.
- Transmission (HST with Cruise Control) A three-range hydrostatic transmission with intuitive operation means faster range-gear selection, while separate forward and reverse foot pedals on the uncluttered platform give precise control of speed and direction.
- Loader Attaching the bucket and changing it is simple. The FLx2106 comes standard with a skid steer tool carrier.

STABILITY - You want a more stable tractor that lets you work harder, doing more things in more places. We get that.

- Frame A larger frame than other models in its category gives more stability and allows for more confident operation in numerous applications.
- Sturdy Compare the tractor weight of the 1526 with that of the competition; this tractor has an excellent power-to-weight ratio.

COMFORT - We start with a simple idea: the more comfortable you are in your tractor, the more work you can get done.

- Operator station The semi-flat platform gives you more legroom and makes entering and exiting the operator station easier.
- Dual hydrostatic control pedals Pedals are positioned to provide a more natural seating position during directional changes.
- Seatbelt Seat-mounted, retractable seatbelt enhances comfort.

EASE OF USE – The work you do is hard. Driving your tractor is supposed to be the easy part. With the return of the 1526, it is.

- Brake location The brake pedal has been moved to the left side of the platform for quicker use of the steering brake, allowing you to work more efficiently.
- Instrument panel Features a straightforward design that lets you read all tractor functions with a quick glance.
- Light switch The light combination switch makes using headlights and turn signals effortless.
- Serviceability A simple release hood latch makes preventative maintenance, like checking filters and fluid levels, easy.

We've been making tractors for a long time, and we believe in what we make. That's why we offer a 5-year powertrain warranty.
